ACTION FOR PEOPLE AND PLANET

| THE FACADE

CONCEPTUAL FRAMEWORK

The figures in this advocacy pack appear masculine to deliberately highlight the erasure and profound isolation of disabled women.

By using masculine-coded low-poly forms, we visualize how neurodivergent/autistic women are often invisible within extractive and repressive systems, trapped behind a facade of "generic" (male) labor.

THE UNITED FRONT

A global advocacy campaign to amplify at-risk voices and demand international accountability.

Target: UN Human Rights Council.
